Good IT metrics establish a fact-based methodology for measuring your progress toward business goals, leveraging data to tell a story. It's easy to capture IT's annual spend but comparing that data point to IT spend year over year makes the data meaningful. The first is simply a measurement. The second is a metric that tells a story. When IT metrics are relevant, they guide decision making ...

Fuzzy-Logic Cognitive Mapping (FCM) is a parameterized form of concept mapping where you can develop qualitative static models that are translated into semi-quantitative dynamic models. Bart Kosko originally developed FCM in 1986 as a way to structure expert knowledge using a soft systems programming approach that is "fuzzy", thought to be similar to the way that the human mind makes decisions.

Mapping the customer journey. In the late 90's and early 2000s, digital marketers' understanding of the consumer buying process was heavily based on the traditional, linear customer funnel - which is obsolete. Today, marketers understand that the path to purchase is not as linear as the funnel model would have us believe. Buyers and browsers have more ways to interact with businesses ...
