Relate math skills to everyday life. Many students struggle with math because they don't understand the practical applications of it. If you can put the material in the context of their lives, they are more likely to understand and learn it. Ask your student about some of their favorite hobbies and try to incorporate those in your lessons. If you're tutoring statistics and they like ...

Algorithm design refers to a method or a mathematical process for problem-solving and engineering algorithms. The design of algorithms is part of many solution theories of operation research, such as dynamic programming and divide-and-conquer. Techniques for designing and implementing algorithm designs are also called algorithm design patterns, with examples including the template method ...
